### Investment objective

The Crucial Minerals Certificate (CRUMI) aims to generate long-term capital growth by primarily investing in equities from companies offering exposure to the mining and metals market. The focus of the Strategy is to invest in those minerals that are important respectively crucial in the global mega trend "electrification" and "energy transition". The Strategy is actively managed and has a balanced portfolio based on a standardized process.

### Investment process

The Strategy-Manager uses a quantitative multi-factor model that identifies sector champions. The focus is on asset quality, valuation, balance sheet, M&A targets, mid- to small caps, behavioral finance and sustainability. The Strategy-Manager actively manages the product and, at his own discretion, but within the given investment guidelines, combines carefully selected and liquid instruments from various regions, sectors and companies.
